measurIT technologies

MeasurIT Technologies Ltd. are pleased to introduce you to our February 2010 technical product update. In this issue:

- [Accurate level indication - superior Float design](#)
- [Avoiding incorrect humidity & temp. values in production and storage](#)
- [Multi instrument calibration](#)

Yours sincerely,
Zoe Williams,
zoe@measurIT.com, +353 (0)53 942 8962

Accurate Level Indication - Superior Float Design

[KM26 Magnetic Level Gauge](#) - for **liquid level measurements** is **safe** for corrosive, flammable, toxic, high/low temperature and high pressure applications.

Principle of operation

A hermetically sealed float with an internal magnetic ring is housed in a non-magnetic float chamber. The float will move up and down in the chamber as level rises or falls in the vessel on which it is attached.

KM26 features **highly visible** level indication with **no process fluid in contact** with the glass. Coating, plating, fouling, fugitive emissions and leaks of hazardous material problems are eliminated. Problems with colorless or dirty fluids are solved since the indicator is non-contact. No gauge glasses to clean. No leaks to repair.. [read more about superior KM26 float design >](#)

Avoiding incorrect humidity & temp. values in production and storage

During production and quality assurance, **temperatures and humidity** values must be recorded in many applications using a **monitoring system**:

- Heating cabinets
- Refrigerators
- Conditioning chambers/cabinet
- Storage climate
- Production climate..

When limit values are exceeded, an alarm should be issued; in addition the data should be safely stored and centrally compiled into reports for evaluations and proof.

testo Saveris helps in a number of applications to compile these values wirelessly or via Ethernet and to securely save and display them - **Protect valuable investments!** [read more >](#)

Multi Instrument Calibration

A calibrator with a wide range of capabilities to cover multiple functions is a modern day necessity.

The 5025 is the ultimate **multi-product calibrator**, designed for both **traditional and new** measurement equipment.

The 5025 can calibrate, bench and handheld multi-meters, frequency meters, ohm meters, ac/dc millivoltmeters, thermocouple indicators, clamp meters, temperature indicators, timer counters, oscilloscopes and many other measurement devices. [read more](#) >
