MeasurIT Technologies Ltd. are pleased to introduce you to our November technical product update.

Yours sincerely,
Zoe Williams, zoe@measurIT.com

5 Minute Flow Meter FLUXUS Portable Flow Meter

This autumn our company would like to present portable flow measurement with ultrasonic FLUXUS Flow Meter.

It is an ideal tool for service and calibration work. Its clamp-on flow transducers are simply mounted onto the pipe from the outside and are thus quickly installed, without process interruption and without production stop.

You get reliable results in less than 5 minutes:

Select a suitable measuring point.

Simply select the pipe material from the list and measure the wall thickness with the ultrasonic probe.

Automatic transducer detection and calibration in the device offer maximum safety and ease of use.

Select pipe material and fluid from the integrated list; input the pipe dimensions as requested.

Apply coupling agent; mount the transducers on the side of the pipe; set and fix the displayed transducer distance.

Immediately after the ENTER button has been pressed, the measured values appear in the display.

Read more about ultrasonic FLUXUS Flow Meters:

- F601 - for liquids,
- G601 - for gases.

Pressure Sensors

Series 40 and Series 42 Pressure Sensors are the industry standards for protecting instrumentation and **pressure measurement of slurry and corrosive fluids**. All sensors are isolated and protected from the process, assuring positive and accurate readings. [Read more..](#)

Ultrasonic Level Transmitter / Switch

The KSONIK MICRO Ultrasonic Level Transmitter or Switch is designed to **measure liquid and bulk solids levels**.

The MICRO is mounted on top of the vessel or tank. The microprocessor in the MICRO fires an electronic pulse that the transducer converts into an acoustic pulse. The pulse travels to the level that is being measured and is reflected back to the transducer. [Read more..](#)

Our Products

- Valves:**
Water Control Valves - **SINGER**
Pinch Valves
All-Rubber Check Valves - **TIDEFLEX**
Tideflex Mixing Systems
Tideflex Effluent Diffusers
[new items](#) Waterflex Check Valves
Flow Regulators
Expansion Joints

- Sensors:**
Oil Spill Detectors - **OilSpy**
Flow Conditioners - **VORTAB**
[new items](#) Flow Meters
Flow Switches
Pressure & Temperature Switches
Pressure Sensors
Level Gauges, Switches & Transmitters
pH Sensors
Suspended Solids & Turbidity Sensors
Humidity & Lux Monitoring

Should you require more information and engineering details please call us at +353 (0)53 942 8962. We'll be happy to answer Your questions.
