MeasurIT Technologies Ltd. are pleased to introduce you to our March technical product update.

Yours sincerely,
Zoe Williams, zoe@measurIT.com

Water Flow Test in New Ross, Co. Wexford

FLUXUS F601 Portable Flow Meter

Problem

Our Customer wanted to prove his water pump performance.

Solution

The solution was the portable **FLUXUS F601** - a robust clamp-on flowmeter which is suitable for the non-

-invasive flow measurements. Clamp-on-transducers are quickly fixed on the pipe, without process interruption and without production stop.

Installation

Thanks to the automatic transducer detection and the clear menu structure, **the measurement is set up in a few minutes.**

Mark Radford, the representative of MeasurIT Technologies Ltd. - "Once again **F601** proved itself to really be **the 5 minute flowmeter**. I just only had to measure the wall thickness with the ultrasonic probe, select pipe material and fluid from list, put the pipe dimensions, select the measuring point and that's it! Immediately after the ENTER button was pressed, the measured values appeared in the display. That was a really quick job!"

The Customer expected the water flow of 300NCMH and this value proved to be correct. We attach the **test report from this measurement.**

The **FLUXUS F601 Portable Flow Meter** is an ideal tool for service work and quick control ultrasonic measurements. The measurement is pressure independent and can take place on pipes of almost any materials and on almost any liquid.

Do you have any comments or questions? Please share them with us at +353 (0)53 942 8962 or zoe@measurIT.com.

Level Measurements

The solutions to measurement of your most demanding **level applications - liquids & bulk solids.**

Safe for sanitary, corrosive, flammable, toxic, high temperature and high pressure applications.

Product Loss Monitors

Product spills both large and small are a fact of life in every dairy factory and town milk treatment plant.

Once operators know that **Product Loss Monitors** are installed in the drains, the waste milk is instead sent to product recovery, again increasing productivity.
