

Your Solution to Water Control Problems

SINGER Control Valves

This year **MeasurIT Technologies** introduce new line of products - control valves by SINGER VALVE INC. - world-class experienced designer, manufacturer and solutions provider.

This full line of valve products meets unique requirements of the Industrial, HVAC, Fire Protection, Irrigation and Water Works markets.

We provide:

- pressure
- flow
- level
- relief
- sustain
- surges
- pumps

CONTROL

Solution to control problems through the proper application of pilot-operated, diaphragm-actuated, automatic control valves.

Pressure Reducing Valve – automatically reduces higher upstream pressure to a lower downstream pressure (adjustable) regardless of fluctuations in inlet pressure or flow.

Booster Pump Control Valve – prevents surges associated with the starting & stopping of pumps.

Flow Control Valve – limits the flow to preset (adjustable) minimum.

Flow Altitude Control Valve – controls reservoir levels with precise repeatability.

Electronic Control Valve – combines the ease and flexibility electronic control with the 100% confidence of integral hydraulic back up in the event of power failure.

Pressure/Flow Control Valve – a patented Pressure Reducing Valve that increases the controlled downstream pressure as the flow demand increases. Requires no flowmeter, electrical supply or batteries.

Anti-Cavitation Valve – controls varying flow throughout full range without damage, despite operating deep within the cavitation zone. Excellent noise reduction.

These are only few examples of applications of our Control Valves.

PINCH VALVES

The heart of this unique shut-off valve is the durable, flexible rubber sleeve which is reinforced with high-strength fabric.

The sleeve, which is the only part of the valve exposed to the line process, eliminates maintenance. The design principle is very simple - two mechanical pinch bars open and close

the elastometer sleeve. The pinching action is on centerline, so the valve closes on a smooth venturi and is self-cleaning.
